

The Green One

by Dlela Lombard

The Trusted Marketplace for NFT's of the Next Generation

First things first... know what you wish to achieve

### Things to think about when issuing a Smart Contract:

A smart contract is the code which automatically activates a process once the NFT is sold:

🕒 Royalty payments

🕒 Generative NFT

🕒 Commission, Escrow transaction, Mint and Gas Fee payments

Optional philanthropy donations (SDGs) / Menthol Protocol

🕒 Other

[illegible]

Transaction Details:																			
🕒 Type of sale (private, auction, giveaways, other)																			
🕒 Private sale:																			
<input type="checkbox"/> Fixed Price      USD 500																			
<input type="checkbox"/> Is the NFT linked to the sale of a tangible asset?      YES      NO X																			
The price of the NFT should be approximately 10% of the tangible asset.																			
▪ If yes, is WISe.ART responsible for logistics and installation?																			
<input type="checkbox"/> Multiple sale yes ____ no X__																			
<input type="checkbox"/> Fragmented sale yes ____ no _X__																			
<input type="checkbox"/> One-off sale yes ____ no _X__																			
<input type="checkbox"/> Duration of the sale (days) _____																			
<input type="checkbox"/> Automatic relisting – duration (days) _____																			

Minting, blockchain, currency :																			
🕒	Escrow account transaction fees payable by the buyer																		
🕒	Type of Token (Ethereum, <u>Polygon</u> ,) CSPR
